TRUMP RIDER COIN
($RTRUMP)

last update

Jun 6, 2024

TrumpRider Coin ($RTRUMP) is a unique cryptocurrency designed to fit into the worlds of comics, marketing, and gaming, with a strong presence on DEXs and CEXs. Built on the Solana blockchain, $RTRUMP symbolizes the fight for individual freedoms and against socialism. Inspired by the resilience of Trump Rider, who learns from his past and becomes a better version of himself, this token represents the movement and fight for rights and freedoms in a dynamic world. This white paper details the tokenomics, use cases, and roadmap of $RTRUMP, along with a burn strategy to ensure long-term value appreciation.

ABSTRACT

In the dynamic world of cryptocurrencies, meme coins have emerged as a significant force, capturing the attention and imagination of investors around the world. Notable examples such as Dogecoin and Shiba Inu have demonstrated how these tokens can generate significant wealth for their investors. Dogecoin, which started as a joke, went on to reach a market capitalization of billions of dollars, making many of its holders rich. This phenomenon underlines the explosive potential of meme coins and their ability to transform initial investments into fortunes.

Investing in meme coins requires a high level of knowledge in cryptocurrencies to maximize their potential. Investors must understand market volatility, trading strategies, and community trends to profit from these digital assets. Crypto education and following news and developments are essential to take advantage of the opportunities presented by meme coins.

Beyond the potential for personal enrichment, meme coins like $RTRUMP play a crucial role in funding serious projects. The difference between a meme coin with its own ecosystem and a seed meme coin on its own blockchain lies in their structure and long-term goals. Meme coins with their own ecosystems, like $RTRUMP, offer significant advantages, including an engaged community, diversified utilities, and a clear roadmap for continued development. These tokens do not just exist as instruments of speculation, but also drive innovation and growth on their respective platforms.

The impact of these meme coins is amplified after they are released to the market, as they are integrated into practical applications and gain widespread acceptance. Storytelling, marketing, and community support are key elements that determine the success and longevity of these projects. With a solid foundation and a clear vision, meme coins like $RTRUMP can transcend their humorous origins to become vehicles for change and financial progress.

RTRUMP INTRODUCTION

In ancient Greece, there was a social process called mimesis, where the representation of reality was sought by showing it in a way that the public could reflect on it by identifying themselves but in the story of another as a means of learning. $RTRUMP adopts this concept to offer a powerful narrative against socialism. TrumpRider Coin ($RTRUMP) combines popular culture with advanced blockchain technology, offering a multipurpose token for various applications. Inspired by the figure of TrumpRider, a fighter for individual freedoms and against socialism, $RTRUMP aims to create an ecosystem committed to social freedom and the exposure of oppressive ideologies through memes and comic book narratives.

TOKENOMICS RTRUMP

TOTAL SUPPLY :

- *Total Supply:* $500,000,000 RTRUMP

NUMBER OF DECIMALS:

- *Decimals:* 9

DISTRIBUTION :

- *RiderVerse (2%):* 10,000,000 $RTRUMP

- *Marketing (5%):* 25,000,000 $RTRUMP

- *Listings en CEX (3%):* 15,000,000 $RTRUMP

- *Liquidity (20%):* 400,000,000 $RTRUMP

- *Airdrop & App Bot (10%):* 50,000,000 $RTRUMP

DEVELOPMENT WALLETS

ASSIGNMENT DETAILS

RIDERVERSE

- *Comics (1%):* Tokens allocated for the creation and distribution of comic content depicting the fight for freedom and against socialism.

- *Thinking Games (1%):* Tokens dedicated to integrating $RTRUMP into various gaming platforms for in-game purchases and rewards, as well as purchasing the Monopoly-like board game "RiderHolder".

RTRUMP

- *Marketing (5%):* Tokens reserved for promotional activities, partnerships, and community engagement to drive awareness and adoption of $RTRUMP.

- *CEX Listings (3%):* Tokens reserved for listing fees and liquidity provision on centralized exchanges to ensure accessibility and trading volume.

- *Airdrop (10%):* Tokens reserved for promotional activities, through the use of a mining application with the aim of increasing community participation and awareness about the impact of $RTRUMP on the Solana network.

RTRUMP COMMUNITY

- *Liquidity (80%):* A substantial portion of the tokens will be locked in liquidity pools to ensure market stability and reduce volatility.

HOW WE MOTIVATE THE HOLDER MENTALITY AT RTR

HOLDUS DOMAINS

By simply holding $RTRUMP you have access to our Holdus community. The objective of these is none other than to ensure decentralized governance with its own system of collecting interest in initial internal projects and the possibility of creating more projects voted for by the holders, generating viral content capable of increasing the visibility of the project. $RTRUMP is designed to live on the Moon as long as the efforts of the Free People and the Holdus sharing the meme posts are stable. If you are reading this document, apart from receiving our thanks, each line of the Trump Rider Coin smart contract represents the objectives, as well as the libertarian values of blockchain technology **from the ironic, libertarian and fun style of our Mirror City Leader;**

TrumpRider.

With this, Trump Rider Coin aims to be an attractive speculation meme where you can carry out daily operations knowing that behind each profit there is a stable project that in the long run will give you a lot of happiness having selected it. By holding $RTRUMP you have the right, **after an internal and private kyc** for security reasons, to access a voting system that will be directly related to the wallet maintained by RTRUMP and you can have up to 3 Wallets for each MAC record of an electronic device **to govern to decide on the quantities and dates of use in which manual burns, liquidity drops, Airdrops, libertarian training financing and support to the development team for internal investments in Rider Universe or**

RiderVerse projects will be managed.

Where holdus obtain profits?

- **Ridertoly**
- **Riderverse books**
- **Trump Rider video game**

SHARK RIDER PRIZE REDISTRIBUTION SYSTEM

SharkRider is a profit model that we apply to equally divide the internal returns of the project. Encouraging global collaboration on the part of holders regarding the publicity of the project. Creating a Public wallet for the project that will be called **Bank of Liberty** once the contract is deployed after the pre-sale. The $RTRUMP of this wallet will be held until the community decides, after secure voting, the actions described above for this sole purpose.

The RTRUMP tokens that will remain in this wallet **will only be used with prior notice by the development team with the approval of the vote** on the platform that will be created for the community and they will be informed by sending an email, communicating the vote in issue to the **holders as a priority.**

SHARK CLASS PROJECTS

HOW MUCH DOES BANK OF LIBERTY EARN IN EACH SHARK CLASS?

- First, **Shark Class 1 projects** whose income, because they are not technological products, depend on a more robust infrastructure, so the Bank of Liberty will only receive a contribution to the savings community of 25% of its net profits.

- The **Shark Class 2 projects** are the initial digital launch projects **such as RiderVerse and TrumpRider "the video game"**. The investment taxes that will be levied on the **net gains on these assets for Bank of Liberty are 50%**. Ensuring that participating in the promotion of these assets is a priority for the community.

- **Shark Class 3 projects** are projects whose funding comes directly from an internal vote among RTRUMP holders in the secure mechanism designated by the development team, **taking advantage of decentralization to bring out the entrepreneur in all of us** through the creation of assets from Web2, Web3 or retail. These types of projects will **contribute 55% of their net profits to Bank of Liberty**.
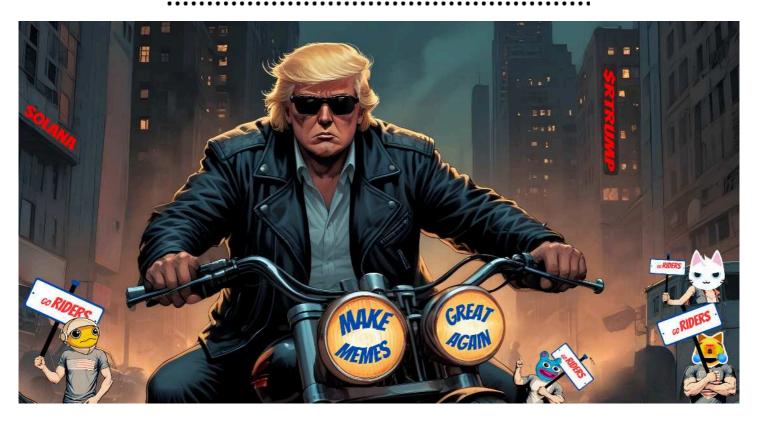

Examples of Shark Class 3 project types

This may be the case of inserting the Rider ecosystem into the Metaverse or creating more specialized products such as films about the history of the Mirror City in the future, **using the decentralization of the community to expand the vision of Rider and learn everything from everyone's mistakes.**

Before the 2027 update, the development team will communicate on the community platform more details about the real expansion **proposals for Shark Class 3 projects**, guaranteeing an unmatched digital asset among the meme coin options in the solana network and the crypto world. With a solid community that not only trusts its developers, but also defends the ideas of freedom and will give examples of how easy it is from cryptocurrencies to change our lifestyle and our relationship with the objective of **generating exponential income from trust and the fraternity.**

SHARKRIDER PRIZE REDISTRIBUTION SYSTEM

SharkRider is a profit model that we apply to equitably divide the internal returns of the project. Encouraging global collaboration on the part of the holders by creating a community wallet for projects that the community decides, as if the community decides, between scheduling manual burns or including it in liquidity, donating it to non-governmental associations related to the causes of the holders and for donations for project

RP	BANK OF LIBERTY	MAINTENANCE AND BURNS	PAYMENT TO THE TEAM
SRC-1	25%	30%	45%
SRC-2	50%	30%	20%
SRC-3	55%	35%	10%

The project's Ridenomics are designed to generate a robust internal economy where each asset guarantees a significant allocation of $RTRUMP in the Bank of Liberty. As a savings pool dedicated to liquidity, burning or creating new income. Making it easier for the token to remain stable and attractive for trading without directly dedicating a wallet for periodic burning, eliminating this type of

tax from the investment.

Motivating the community to generate marketing and advertising actions for the project as a means of generating passive income on their investment.

This liquidity will be locked and the lock visible on various platforms, including decentralized exchanges (DEX) and liquidity pools, to maintain a healthy trading environment.

ROAD MAP

PHASE 1: PRE-SALE AND LAUNCH

- *Q1 2025:* Introducing Social Media and RiderVerse

- *Q2 2025:* Pre-sale Presentation

- *Q2 2025:* Audit smart contracts on the Solana blockchain

- *Q2 2025:* Initial token distribution and creation of liquidity pools

- *Q3 2025:* Secure listings on centralized exchanges

- *Q3 2025:* Launch educational marketing campaigns on the impact of memes and community engagement initiatives based on the philosophy of Trump Rider as a polarizing and constantly moving meme

- *Q3 2025:* Expand marketing efforts and partnerships with influencers and brands

....

FASE 2: EXPANSIÓN DEL ECOSISTEMA

- *Q4 2025:* Partner with comic book creators and launch the first TrumpRider comic book series

- *Q4 2025:* Presentation of the Board Game

- *Q1 2026:* Presentation of the Economy and the oracle of the RiderVerse video game

- *Q1 2026:* Introducing the RiderVerse Rare NFTs

- *Q1 2026:* We started developing the video game

- *Q2/Q3 2026:* Official teaser presentation of the RiderVerse video game

....

FASE 3: CRECIMIENTO Y ADOPCIÓN

- *Q3 2026:* Community vote to create an animated movie of the story of the first book by enabling a donation wallet

- *Q3 2026:* Expand marketing efforts and partnerships with more recognized influencers and brands

- *Q4 2026:* Introduce additional utility features and exploit the native cross-chain capabilities of the Solana network

- *Q4 2026:* Movie Teaser Presentation

- *Q1 2027:* Learn from the community and propose various roadmaps for the evolution of $RTRUMP assets, which will have a proportion of profits for continued development, community growth, and ecosystem improvements.

- "We're not done yet, folks. Big, big things are coming. You don't want to miss out!"

- *Q3 2027:* UPDATE ROAD MAP

(THIS UPDATE MAY BE PUBLISHED BEFORE THE DATE)

WHY INVEST IN CREATING LIBERAL COMMUNITIES

....

ATTACHMENTS

EXHIBITION OF SOCIALISM AND THE HERO $RTRUMP

The decline of socialism has been evident in many countries, where promises of equality and well-being have transformed into oppression and poverty. Tyranicus, the villain that represents this ideology, uses cultural manipulation and economic control to consolidate his power. However, with $RTRUMP as the hero, the crypto community can find a light of hope and a symbol of resistance.

STATISTICAL ANALYSIS

Recent studies show growing discontent with socialism, especially in countries that have experienced its adverse effects. 65% of respondents in Latin America, for example, express frustration with socialist policies, while in Eastern Europe, 70% prefer freer economic systems. This disenchantment reflects a unique opportunity for $RTRUMP to position itself as a beacon of freedom and prosperity.

In short, $RTRUMP is not just an investment token, but a cultural and political movement that uses blockchain technology and popular culture to fight socialism and promote individual freedoms. Join us on this mission and become a hero of freedom with TrumpRider Coin.

TEAM

Our team is made up of highly qualified professionals:

- **CTO:** Cyber mathematician with over 10 years of experience in cryptocurrencies.

- **CEO and Blockchain Advisor:** Specialized in the creation of DAOs.

- **Graphic Designer:** Meme specialist.

- **Executive Producer:** Specialist in the creation and dissemination of events.

SAGA RIDERVERSE

The saga is designed in RiderVerse to make an initial film and, if this generates enough profits, create a second film based on the essential book. In principle, our need is more to create content and spread the story than to create an ostentatious mega production. That will be determined by the community. From the first to the realization of the others, the films will all be fully financed by the community through donations. The first part will be based on the first book. And each book can be made into an animated film that will not be childish and will describe the graphic universe of the story of the games with a very exciting script where at each stage philosophical reflections of freedom will be exposed before the experience of the character. This project will be explained in greater depth on the official Trump Rider website on the RiderVerse page.
